

STUMP GRINDER

Applications

A stump grinder removes tree stumps by means of a rotating cutting disk that chips away the wood. It incorporates a cutter wheel with fixed carbide teeth. The cutter wheel movements are controlled by hydraulic cylinders to push the cutter wheel teeth laterally through the stump and to raise and lower the cutter wheel.

Specifications

Operating height - 24"

Wheel diameter - 20"

ATTACHMENTS FOR SKID STEER LOADERS

NOTE:- All dimensions are variable with in $\pm 1.5\%$. VAEPL reserves the right to change specifications without prior notice
